

We Grow Together

Use of Technology to Support Early Care and Education Professional Development

Overview

- / Key findings from literature**
- / Description of We Grow Together**
- / Initial findings about technology use**

Technology and professional development (PD)

We Grow Together (WGT)

- **PD system for caregivers working with infants and toddlers in center-based care and family child care homes.**
- **Relationship-based coaching from a trained local PD provider.**
- **Access to easy-to-use online tools.**

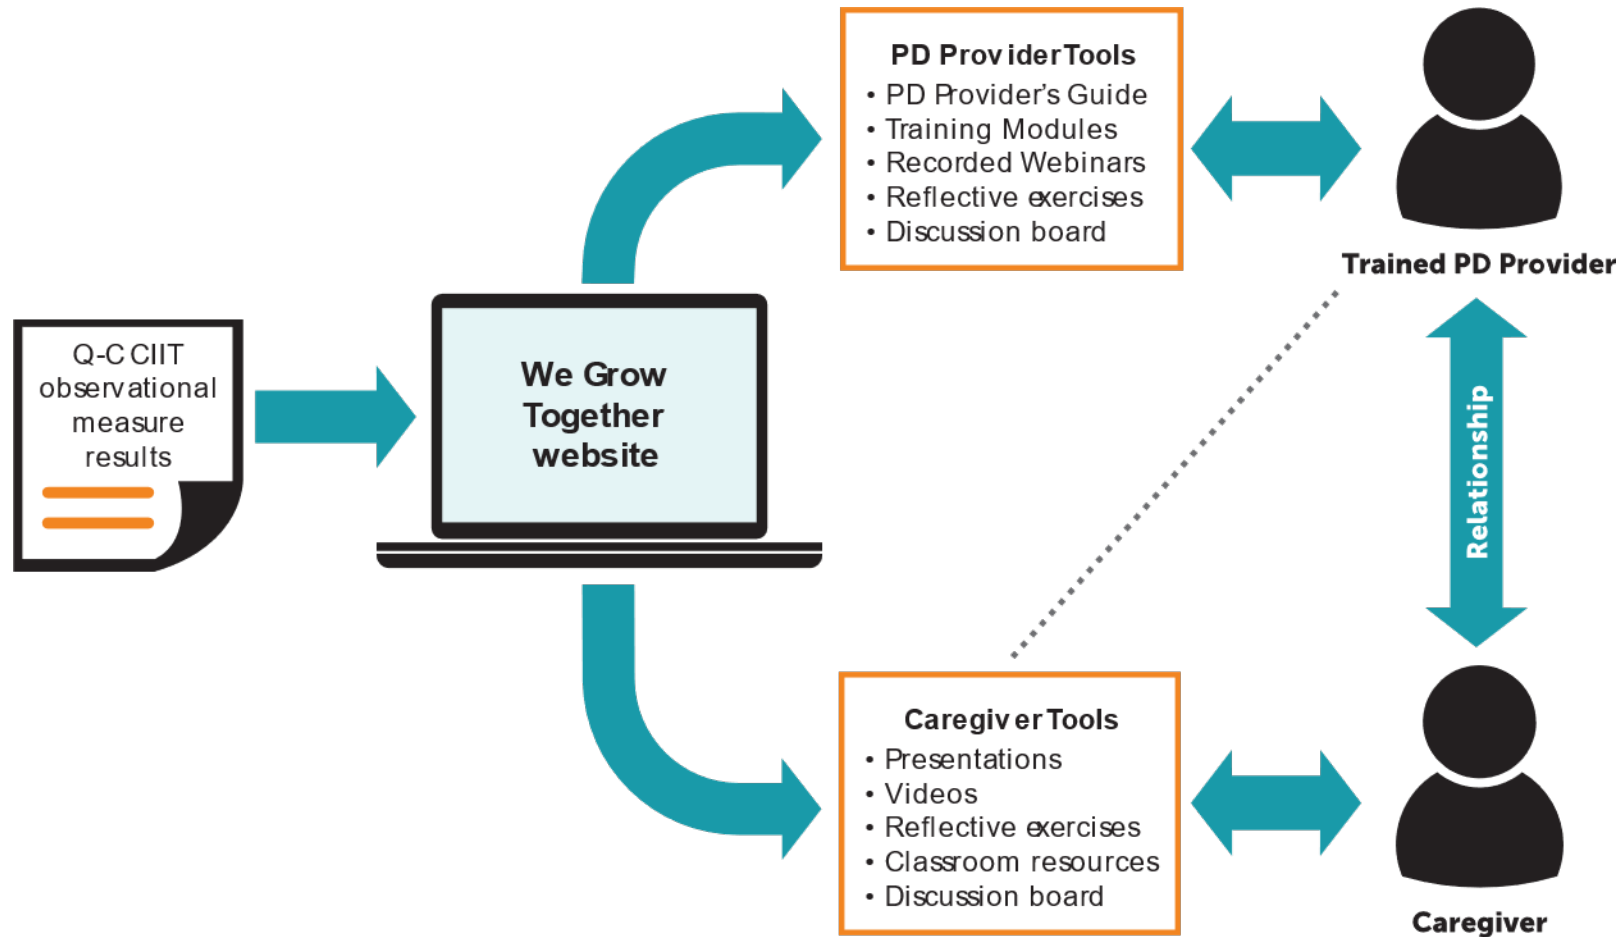

Quality of Caregiver-Child Interactions for Infants and Toddlers (Q-CCIIT) observational tool

The Q-CCIIT observational tool focuses on high quality caregiver-child interactions that support

- Social-emotional development
- Language and literacy
- Cognitive development

Key components of WGT

Modules

Introductory Materials for Caregivers
Both Caregivers and PD Providers

Support Social-Emotional Development: Caregiver-Child Relationships
Both Caregivers and PD Providers

Module 1: Support Social-Emotional Development: Caregiver-Child Relationships

Support Children's Language Use
Both Caregivers and PD Providers

Module 2: Support Children's Language Use

Support Children's Understanding of Language
Both Caregivers and PD Providers

Module 3: Support Children's Understanding of Language

Key practices

Children's cues

Conversations

Questions

Extend language

Use new words

Tools

Narrated presentations

Classroom supports

**Handouts for colleagues
and families**

Role plays

Step-by-step guides and checklists

Progress checklists/graphs

**Videos of caregivers
implementing key practices**

PD provider and
caregiver meet

Use WGT

2018-2019 WGT field test participants

- **Analytic sample included 271 caregivers and 168 PD providers:**
 - 89 Early Head Start center-based pairs
 - 125 community center-based pairs
 - 57 family child care pairs
- **Purposive sampling to obtain diversity in setting types in 10 different geographic areas**

2018-2019 WGT field test

- **4 months of WGT implementation**
- **Data collection was before, during, and after WGT implementation.**
 - Q-CCIIT observations (fall and spring)
 - Surveys (fall and spring)
 - Web-analytics and implementation data (during implementation)

WGT orientation and supports

- Remote PD provider training
- Website navigation video and printable instructions
- Technical assistance: Phone, Email, Office Hours
- PD provider implementation webinars
- Online discussion boards
- For the field test, iPads

Technology related findings

How caregivers accessed WGT

■ WGT website analytics

■ Caregiver survey responses

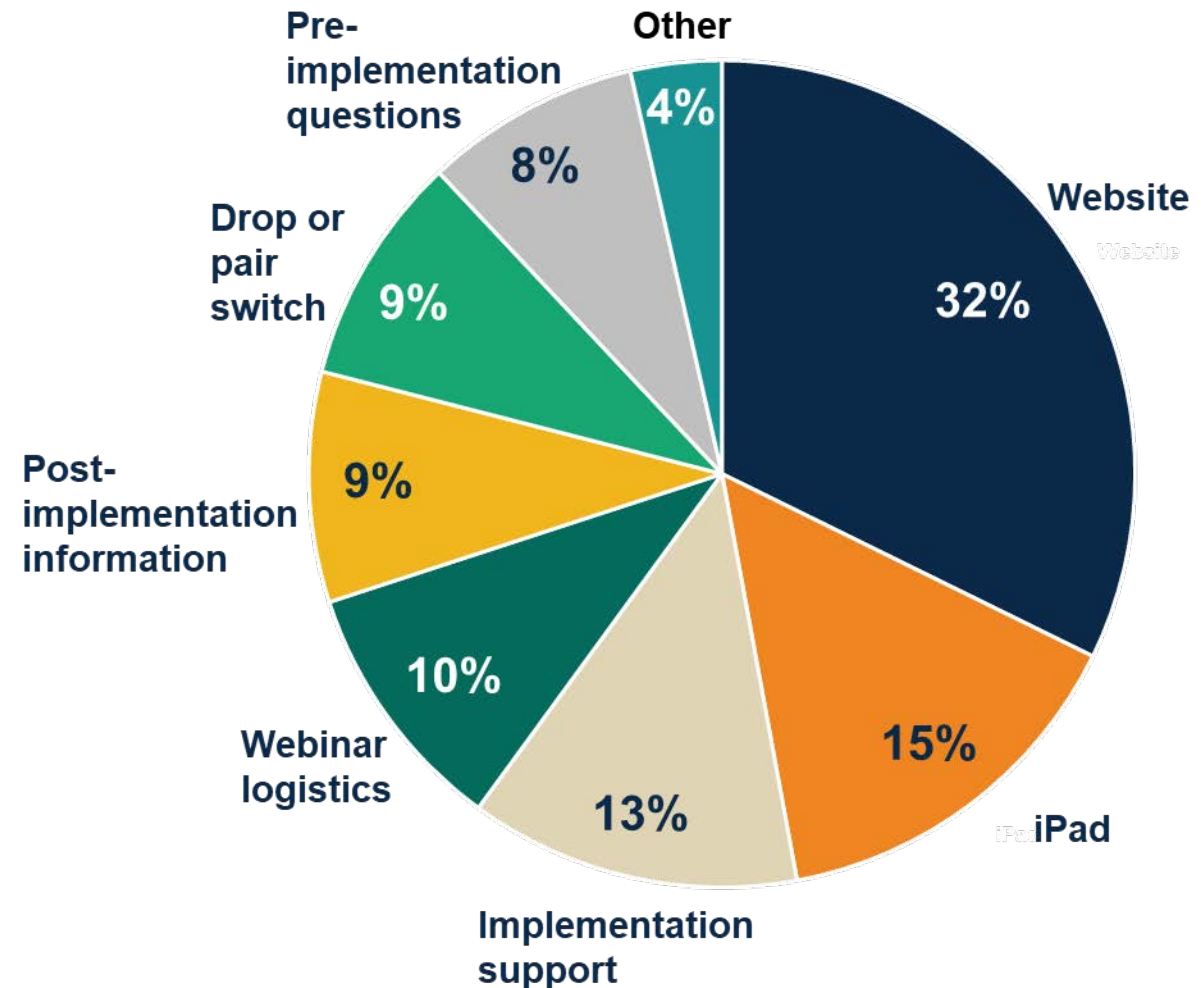

Caregivers spent an average of 3.9 hours on the WGT website

Source: WGT website analytics

Technical assistance inquiries

- Initial challenges accessing WGT's technological components
- Caregivers report devices and materials were easy to use and navigate once they logged in

Caregivers gave the website high marks

- **WGT website: mean rating of 5.2 out of 6.0**

- **Survey responses:**
 - Easy to learn to use (97.2 percent)
 - Easy to use (96.0 percent)
 - Easy to find the information needed (98.8 percent)

Nearly all caregivers video-recorded themselves

- **93 percent of caregivers video-recorded themselves**
- **72 percent of caregivers reported it was easy to use the tablets**
- **91 percent of PD providers reported observing caregivers**

Comfort with technology related to satisfaction with WGT

Caregivers who reported greater comfort with technology (fall 2018 survey), had the following responses in spring 2019:

- Reported finding it easier to use the iPad to record practice
- Tended to have greater satisfaction with the WGT website
- Tended to more strongly agree that the WGT practices were helpful for children's progress
- Tended to more strongly agree that the WGT activities were useful
