# ***ZERO TO THREE Critical Competencies for Infant-Toddler Educators™***

Sarah LeMoine • Director, Early Childhood Workforce Innovations department

Developing and Assessing Competencies for Teachers and Caregivers Serving Infants and Toddlers meeting •  
Washington, DC • January 4, 2017

# Critical Competencies

The ZERO TO THREE Critical Competencies for Infant-Toddler Educators™ describe what educators can do to make the most of teacher–child interactions

Support educators who work in group settings (center-based and family child care homes) with infants, toddlers, or both

Focus on pedagogy—the method and practice of teaching

Detail essential and observable skill sets that effective educators use to optimize babies' and toddlers' social-emotional, cognitive, and language and literacy development

Emphasize considerations for supporting high-needs populations and multi-language learners

# Critical Needs, Opportunities, & Competencies

ZERO TO THREE

**lack of information,  
opportunities, & capacity**

**impact of teacher-  
child interactions**

**unique child & family,  
& workforce needs**

**increased local, state,  
& national attention**

# Critical Needs & Opportunities

How do we advocate for, develop, and implement partnerships, policies, and systems that respect the differences and also build common ground?

# Overarching Principles: Irving Harris Foundation's Diversity-Informed Infant Mental Health Tenets

ZERO TO THREE

THE DIVERSITY-INFORMED INFANT MENTAL HEALTH TENETS ARE A SET OF GUIDING PRINCIPLES THAT RAISE AWARENESS ABOUT INEQUITIES AND INJUSTICES EMBEDDED IN OUR SOCIETY. THE TENETS EMPOWER INDIVIDUAL PRACTITIONERS, AGENCIES AND SYSTEMS OF CARE TO IDENTIFY AND ADDRESS THE SOCIAL JUSTICE ISSUES INTRICATELY INTERTWINED WITH ALL INFANT MENTAL HEALTH WORK. THE TENETS ARE ROOTED IN BELIEF THAT SELF-AWARENESS AND INTENTIONAL ACTION ARE THE CORNERSTONES OF PRINCIPLES OF EQUITY AND INCLUSION. [LEARN MORE](#)

# Critical Competencies Model

## Critical Competencies Sub-Areas

### Supporting Social-Emotional Development

1. Building Warm, Positive, and Nurturing Relationships
2. Providing Consistent and Responsive Caregiving
3. Supporting Emotional Expression and Regulation
4. Promoting Socialization
5. Guiding Behavior
6. Promoting Children's Sense of Identity and Belonging

### Supporting Cognitive Development

7. Facilitating Exploration and Concept Development
8. Building Meaningful Curriculum
9. Promoting Imitation, Symbolic Representation, and Play
10. Supporting Reasoning and Problem Solving

### Supporting Language & Literacy Development

11. Promoting Communication Exchange
12. Expanding Expressive and Receptive Language and Vocabulary
13. Promoting Early Literacy

- Overview of the developmental area for infants and toddlers
- Summary of infant–toddler educators’ role in supporting development in the area
- Specific, pedagogy-focused skill statements
- Considerations for working with high-needs populations and dual-/multi-language learners
- Examples in practice with young infants, mobile infants, and toddlers

# Tenets underpin the *Critical Competencies'* Additional Considerations

ZERO TO THREE

ZERO TO THREE Critical Competencies for Infant-Toddler Educators™

## + Considerations for Supporting Vulnerable Populations

What about infants and toddlers who may be lacking warm, positive, and nurturing relationships at home? Sometimes life events and circumstances prevent parents and guardians from offering the stable and nurturing interactions needed to help infants and toddlers develop secure and consistent relationships. When this happens, it is even more important for infant-toddler educators to provide a stable and positive relationship with very young children that augments and supports relationships with parents and guardians at home. Unfortunately when children come from inconsistent caregiving relationships at home, it is sometimes more difficult to establish secure relationships in out-of-home care settings. Children may be unresponsive to a teacher's initial attempts at affection or may be overstimulated by positive affect. In addition, young children at risk may frequently test their teachers—such as by deliberately misbehaving—to see whether those teachers will respond consistently. In these cases it is important to offer consistent, predictable,

and positive interactions with children. Infant-toddler educators should also be sure to understand what works best for each child and tailor their interactions to match that child's tolerance. For early educators, a critical part of supporting warm, positive, and nurturing relationships is to continue to work with parents and guardians in the home to develop consistency across settings and to support and strengthen the parent-child bond. Regardless of their home circumstances, some children with delays or disabilities may need to be explicitly taught interaction and other skills so they can participate in and build trusting relationships. Competent and skilled early educators work with family services workers, early childhood mental health providers, early intervention specialists, and others involved in supporting the family to ensure they remain aware and supportive of child-parent relationships. Over time a teacher's consistent and contingent warmth and affection can help each child develop trusting, positive relationships.

Area 1

## + Considerations for Supporting Dual-/Multi-Language Learners

What about infants and toddlers who are learning more than one language? The social-emotional components of communication can be even more important as caregivers strive to build relationships with children and families who speak other languages. For example, teachers can build a bond with each child by intentionally using nonverbal communication and expressing interest in connecting with them. Nonverbal communication can be used as a support for verbal communication and includes activities such as pointing, using props, making gestures and facial expressions, demonstrating or "acting it out," looking at and reading books with the child, showing pictures, and using sign language. Ways of expressing warmth and affection vary across cultures. While some cultures tend to use physical contact more often (e.g., hugging, kissing), other cultures tend to express positive affect from a physical distance. Teachers should keep these cultural nuances in mind as they connect with the children in their program who might be coming from diverse backgrounds. For example, some children might be accustomed to kissing and hugging everyone "hello" as they greet others when they enter a new space; however, other families might not think this

is appropriate and might prefer to wave "hello." In partnership with families, teachers can become cultural and linguistic navigators, incorporating elements of various cultures and languages into the everyday routines, explaining how families do things or communicate similarly, but also noting some of the differences so children will be exposed to different cultural and linguistic practices. These cultural and linguistic differences provide teaching opportunities that can help children understand more about their own culture and home language, and become global citizens. As teachers develop bonds with children, they also need to engage in self-reflection to ensure that they don't overlook a child because they are not able to share verbal language and/or experience a language and cultural match. Learning a few words or phrases from the child's home language is helpful in forming warm and positive relationships. Educators should use children's home languages to the maximum extent possible and be intentional about using correct pronunciations and grammar. Teachers must remember that establishing a meaningful, warm, and positive connection is the primary goal.
