

QRS Assessment Plenary Discussion Topic

November 16, 2011

Please discuss one of the two questions on this sheet with your table group.

Please fill in the major themes that emerged from the discussion and leave it on the table, we will use your responses to inform the closing session of the CCPRC meeting on November 17.

1. What one or two findings from the systems presentation could you bring back to engage stakeholders in your state? What do you still need to know about how to assess systems development and how QRIS and other quality improvement efforts fit into the picture?

2. Thinking about where you are in ensuring quality measurement systems are reliable and valid, what information do you need to support this work?
