## A National Overview of Grantee CLASS ${ }^{\text {TM }}$ Scores in 2014

During the 2013-2014 program year, ${ }^{1}$ the Office of Head Start (OHS) used the Classroom Assessment Scoring System (CLASS ${ }^{\text {M }}$ ) Pre-K Teacher-Child Observation Instrument during its on-site reviews of grantees. CLASS-reliable reviewers visited a random sample of preschool classrooms to obtain granteelevel scores. This document provides descriptive statistics of the 2014 grantee-level CLASS ${ }^{\text {M }}$ data.

For more information, see: Use of CLASS ${ }^{\text {TM }}$ in Head Start, available on the Early Childhood Learning and Knowledge Center (ECLKC). Individual grantee CLASS ${ }^{\text {TM }}$ reports also are available on the ECLKC in the Program Service Reports.

## National Statistics by Dimension

In 2014, 404 Head Start grantees received CLASS ${ }^{\text {TM }}$ reviews. The CLASS ${ }^{\text {TM }}$ tool has 10 dimensions of teacher-child interactions rated on a 7-point scale, from low to high. The 10 CLASS ${ }^{\text {m }}$ dimensions are organized into three domains: Emotional Support, Classroom Organization, and Instructional Support.

- Emotional Support assesses the degree to which teachers establish and promote a positive climate in their classroom through their everyday interactions.
- Classroom Organization assesses classroom routines and procedures related to the organization and management of children's behavior, time, and attention in the classroom.
- Instructional Support assesses the ways in which teachers implement the curriculum to effectively promote cognitive and language development.

## National Statistics by Domain

Grantee-level dimension scores are averaged to produce grantee-level domain scores.* Previous largescale studies of CLASS ${ }^{\text {™ }}$ have shown that the average preschool classroom scores are higher in the domains of Emotional Support and Classroom Organization than in the domain of Instructional Support.

| OHS CLASS Descriptive Statistics, 2014 <br> National Grantee-Level Scores by Domain |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Domain | Mean | Standard <br> Deviation | Minimum | Maximum |
| Emotional Support | 6.10 | 0.30 | 4.98 | 7.00 |
| Classroom Organization | 5.83 | 0.38 | 4.54 | 6.79 |
| Instructional Support | 2.90 | 0.58 | 1.00 | 5.19 |

*Note: To calculate the Emotional Support domain, subtract the Negative Climate score from 8, add the Positive Climate, Teacher Sensitivity, and Regard for Student Perspective scores, then divide by 4.

## Distribution by Domain

The following table and graphs provide additional information on how grantee-level domain scores are distributed nationally.

| OHS CLASS Descriptive Statistics, 2014 <br> National Distribution of Grantee-Level Domain Scores |  |  |  |
| :--- | :---: | :---: | :---: |
| Domain | Lowest 10\% | Median (50\%) | Highest 10\% |
| Emotional Support | 5.7167 | 6.08 | 6.50 |
| Classroom Organization | 5.3646 | 5.83 | 6.35 |
| Instructional Support | 2.2027 | 2.83 | 3.65 |

## Glossary

Mean: the average value, calculated by summing all scores and dividing by the number of scores Median: the middle value, where half the scores are below this point and half are above it N : the total number of values in a set
Standard Deviation: a value that shows how much variation exists in a set of data
