Project Title:

Windows of Opportunity Curriculum: Everyday Learning to Enhance Parenting Competencies and Child Development

Grantee:

Carol M. Trivette

Project Funding Years:

2005-2008

Affiliation:

Orelena Hawks Puckett Institute

Project Abstract:

Orelena Hawks Puckett Institute partnered with the Family Infant and

Preschool Early Head Start (EHS) Program to develop, implement, and evaluate a home-based curriculum for EHS parents and their young children. The new curriculum, Windows of Opportunity, focused on building the capacity of parents to use everyday learning opportunities as the basis for promoting their child's cognitive and social-emotional development. Participants included eight teachers trained to use the curriculum with 80 families from a local EHS program. A multiple baseline design assessed the extent to which the teacher training influences teachers' use of the targeted practices and to ascertain parents' use of the targeted practices. The Windows of Opportunity curriculum would begin to meet the need for a home-based curriculum that builds on parents' capacity to foster their child's development as part of the everyday activities and routines.

Sample:

Early Head Start programs serving approximately 80 families

Measures:

Children

Developmental Observation Checklist

Child Development Inventory

Preschool Language Scale-3rd Edition (PLS-3)

Ages & Stages Questionnaire: Social-Emotional (ASQ:SE)

Parents

Parenting Self-Efficacy Scale

Activity Setting Observation Scale

Responsive Teaching

Instructional Practices Observational Scale

Literacy Practices Observation Checklist

Child Learning Observation Practices Checklist
